📍 Exeter, Devon, UK 🇬🇧

Summary

I am a python developer with a traditional classical education in pure science.
Having worked in software development since 1998 and specifically with python for 13 years I have a proven record of improving process performance by implementing new ideas, automation and generating time-saving tools. A self motivated, proactive, self starter with ability to use initiative, innovate and operate autonomously or collaboratively with team members.

Key Skills

- **Python**
- Git, GitHub (and Actions)
- FastAPI
- Ansible
- Technical documentation
- Automation (QA, AWS, Networks, CI/CD)
- Networking
- Linux
- Docker
- OpenAPI, REST API's, GraphQL

Education

- MSc. Biochemistry, University of Reading.
- BSc. Biochemistry with Chemistry, University of Reading.
- 'A' Levels: Physics, Chemistry, Pure Mathematics and Biology.

Professional Qualifications

- Cisco: CCNA, CCNP, CCDA, CCDP.
- Citrix: CCEA, CCA.

Employment History

Python Developer, Xilinx Technology *(May 2020 –)*

- Developed the automated testing and development infrastructure frameworks
- Source code maintained on GitHub using GitHub flow. CI/CD utilizing workflows and Actions.
- Identified inefficiencies in existing ecosystems and implemented processes/tools to remove them.
- Developed and maintained a FastAPI reporting system on AWS EC2, S3 and DynamoDB using python Lambda functions and Boto3 scripts.

Self employed *(Oct 2019 – Apr. 2020)*

- Designed from scratch the hardware and software for an original IoT project.
- Investigated the many aspects of commercial IoT projects including legal/patent and manufacturing requirements.
- Conducted performance testing of numerous Single Board Computers to evaluate computational and power requirements.
- Fabricated a final fully operational prototype demonstrator utilising OpenCV with a Django management interface.

Career Break *(Jan. 2019 – Sep. 2019)*

This period was taken to renovate the house and relocate.

Software Engineer, Qualcomm *(Aug. 2016 – Dec. 2018)*

- Debugged issues with the Python framework and test code; defined and fixed bugs found. Developed new features of the test framework.
- Ensured Python environments were up-to-date and compatible with the latest language developments, and with other environments used across the company with which it interfaced.
- Supported colleagues with Python code development. Provided training for new users.
- Defined and developed new automation tools to make testing and debugging more efficient.
- Converted and updated legacy Python scripts and libraries from version 2 to 3.

Python Automation Engineer (DevOps), Cisco *(Jul. 2011 – Aug. 2016)*

- Designed, developed, coded and debugged automated environments for both Development and QA departments which had a large impact on the agile Kanban two-week cadences.
- Supported DevOps by providing tooling, monitoring dashboards and process automation.
- Automated microservice deployment by providing Ansible playbooks, Puppet manifests, Python scripts and Linux shell scripts.
- Supported a challenging microservice infrastructure which utilised a multitude of technologies including: Oracle and Vertica DB's, CouchDB, Memcached, Squid, ETL, ActiveMQ and Redis. Virtualized environments were provided by VMware, VirtualBox and KVM.
- Utilized containerization in the form of Docker to provide consistent development environments.
- Automated QA tests used by the Jenkins CI/CD pipelines.
- Monitored microservices with the aid of ELK Stack, Grafana, Graphite and Prometheus..

Python QA Engineer, Solarflare Communications *(Mar. 2010 – Jun. 2011)*

- Developed and coded an automated test framework in Python which along with open source and commercial tools were used to verify performance and protocol functions of 10Gb network devices.
- Created Test specifications from IETF RFC specifications for protocol verification and subsequent automation with Python.
- Developed and supported various reporting Django dashboards.

QA Automation Engineer, 3Com *(Feb. 2009 – Jan. 2010)*

- Tested all functional and non-functional aspects of CentOS embedded software on a unified security platform, encompassing firewall, Router, web filtering, spam filtering and anti-Virus functionality.
- Utilised Spirent Smartbits packet generators, Avalanche traffic generators and automated tests with Python, Perl and Tcl.

Technical QA Team Leader, Citrix *(Dec. 2005 – Dec. 2008)*

- Completed many diverse full life cycle testing projects including release 4.5 of Presentation Server, XenApp, XenDesktop, XenServer and Edgesight products.
